Guaranteed**

## **New S900 AquaCafé RO P5**

*Protection of Equipment  
and LOW COST maintenance*

### **The NEW AquaCafé S900**

- Gives best protection from limescale
- No pitting of stainless steel
- Low Maintenance Costs
- Full Coffee Flavour
- Australian Made
- USA Housing
- USA Membrane
- Includes Australian Plumbing Compliant Brass Hardware

The system has been chemically engineered specifically for the coffee and food industry.

The S900 AquaCafé is compact. The system can be suspended from a wall fitting and the tank size can be varied.

This is a low cost reverse osmosis system. More importantly, check with your equipment supplier on the **cheap and effective replacement set of 4 cartridges**. A membrane that should provide a 2-3 year life. In comparison with the cost and occupational hazards of de-scaling, the S900 is the intelligent option.

Please note that this system is only suitable for use on disinfected potable water supplies from your local water authority. For areas where tank or other water is required please consult Aqualife. To achieve the water quality indicated above the system must be installed and operated in accordance with the maintenance instructions. On site verification of the water quality is required for municipal water supplies.

#### **DIMENSIONS:**

<b>System</b>	W 47cm x D 23cm x H 54cm (Allowing for filter change)
<b>Tank</b>	L 30cm x W 30cm x H 40cm
